

Jims Jungle Retreat – Corbett, India

Jim's Jungle Retreat

Luxury Wildlife Resort At Corbett National Park

About Jims Jungle Retreat

Jim's Jungle Retreat is situated along the south-east border of **Corbett Tiger Reserve**. It is roughly two km from **Jhirna** forest gate. **The Dhangari** gate, which leads to the **Ramganga** reservoir, is a half hour drive north.

Cottage At Jims Jungle Resort

Rooms

The retreat houses 12 huts that are primarily built with local materials. The huts are comfortable, fitted with all modern conveniences, yet simple, and close to nature in design. The huts have attached modern bathrooms, the rooms are spacious and there is a private verandah to sit out on to enjoy the sights and sounds of the jungle. Facilities inside the room include telephone, mineral water for drinking and balcony. All rooms have an attached washroom with hot and cold water supply.

Jeep Safari At Corbett Park

Dining Area At Jims Jungle Retreat

The **Jim Corbett National Park** is a haven for wildlife adventure lovers. **Bengal Tigers**, are plentiful in the park but are not easily spotted due to the abundance of camouflage in the reserve. Thick jungle, the **Ramganga River**, and plentiful prey make this reserve an ideal habitat for **Tigers** who are opportunistic feeders and prey upon a range of animals. The **Tigers** in the park have been known to kill much larger animals such as **Buffalo** and even **Elephant** for food. There have been incidents of tigers attacking domestic animals in times when there is a shortage of prey.

Leopards are found in hilly areas but may also venture into the low land jungles. Smaller felines in the park include the **Jungle Cat**, **Fishing Cat** and **Leopard Cat**. Other mammals include four kinds of **Deer** (**Barking**, **Sambar**, **Hog**, **Black Buck** and **Chital**), **Sloth** and **Himalayan Black Bears**, **Indian Grey Mongoose**, **Otters**, **Yellow-Throated Martens**, **Ghoral** (**Goat-Antelopes**), **Indian Pangolins**, and **Langur** and **Rhesus Monkeys**. **Owls** and **Nightjars** can be heard during the night.

In the summer, **Elephants** can be seen in herds of several hundred. The **Indian Python** found in the reserve is a dangerous species, capable of killing a **Chital Deer**. Local **Crocodiles** were saved from extinction by captive breeding programs that subsequently released **Crocodiles** into the **Ramganga River**.
